The BMW M20 is a straight-six SOHC piston engine produced from 1977-1993. It was released in 1977 in the E12 520/6 and E21 320/6 and began to be phased out following the introduction of the M50 engine in 1990. Like the larger capacity M30 engine from which it is derived, the M20 has a SOHC and 2 valves per cylinder.

The M20 engine uses full-floating wrist pins, so you can press them into the rod with hand tools. Once the wrist pin is centered on the rod, install the snap rings in the piston. If the clearances for the rotating assembly are within tolerances, coat the bearings with assembly lube and torque the main and rod caps to factory specifications.
