Canon EOS Rebel T3i Manuals | ManualsLib

Your Canon Rebel T3 or T3i offers three different autofocus schemes, which you select through the AF mode control. The three choices work like so: One Shot: In this mode, which is geared to shooting stationary subjects, the camera locks focus when you press the shutter button halfway. Focus remains locked as long as you [...]

Changing the Autofocus Mode on a Canon EOS Rebel T3 Series ...

By the way, for this post, I'll be using my Canon Rebel T7i. The basic concepts of what I'll explain down below will be true for the T6i, T5i, T4i and the T3i. I completely forget what the T2i looks like, so I won't include that one on this list.

How to Manually Select a Focus Point with your Canon Rebel ...

So I am using a T3i and trying to do video indoors at night with some lights on. I've got a Tamron 17-50mm non-vc f/2.8. I'm just having a hard time keeping things in focus when on manual focus. I don't use live view (maybe I should), and the viewfinder is really hard to identify if the picture is in focus.

Canon Knowledge Base - Troubleshooting steps to follow ...

A little trick to help with focusing on the T3i before shooting if you're not in too much of a hurry is to put the lens on AF, move the focus box over your subject, and half-depress the shutter button. This method is a little slow, but accurate. If you're not comfortable with manual focus, this is the easiest way to focus.
