Kinematical problems of both classical and quantum mechanics are considered in these lecture notes ranging from differential calculus to the application of one ...

Topics in Dynamics: I: Flows

Using laboratory experiments and illustrations to further understanding, the author explores topics ranging from the classical hydraulics of single-layer flow to more complex situations involving ...

Topographic Effects in Stratified Flows

Critical transitions are observed in many complex systems. This includes the onset of synchronization in a network of coupled oscillators or the emergence of an epidemic state within a population.

A universal route to explosive phenomena

In this work, we present an efficient rank-compression approach for the classical simulation of Kraus decoherence channels in noisy quantum circuits. The approximation is achieved through iterative ...

Low-rank density-matrix evolution for noisy quantum circuits

Dislocations are one-dimensional defects in crystals, enabling their deformation, mechanical response, and transport properties. Less well known is their influence on material chemistry. The severe ...

The hidden structure dependence of the chemical life of dislocations

I embrace challenges and do my best to overcome them, that's how I got accepted to the physics PhD program of UC Berkeley even though I am an international student, and won a Fulbright fellowship. I ...
