The high-capacity a erothermal Heat Pump, designed by Daikin, allows the connection of several indoor units (hydrokits) with or without production of SHW. This system is therefore especially recommended for installations with a high heating and/or SHW demand, such as apartment blocks, gymnasiums and sports centres. Savings and more savings:

#### Daikin Altherma Flex | Daikin

Daikin's Altherma system is available in heating-only or reverse cycle (heating and cooling) options. The reverse cycle system cools your home by simply reversing the heating process. The system extracts heat from the inside of your home and channels it to the outside, leaving your home cool.
