Cordova for Windows 10 - Apache Cordova

The `-g` flag above tells npm to install cordova globally. Otherwise it will be installed in the `node_modules` subdirectory of the current working directory.. Following installation, you should be able to run cordova on the command line with no arguments and it should print help text. Create the App. Go to the directory where you maintain your source code, and create a cordova project:

Creating your first Cordova app - Apache Cordova

Star Track is a Cordova app that allows you to search for songs (tracks), preview a list, and star the tracks in your results. It's built using Framework 7, a jQuery-like JavaScript library. It was created by the Phonegap team and announced on their developer blog April 2016. Play around with their sample on Github.
