1. N55 Valve Cover/Valve Cover Gasket Oil Leak. Similar to the N54, a leaking valve cover, valve cover gasket, or PCV valve are among the most common problems with the BMW N55 engine. The rubber valve cover gasket is prone to degrading over time; typically rubber with high temperatures, and constant heating/cooling do not mix well.

The 5 Most Common BMW N55 Engine Problems - BMW N55 Tuning

The N55 engine had grey cast iron cylinder liners and, in a new development, the webs between the cylinders had a groove so that coolant could flow from one side of the crankcase to the other. The N55 engine had a lightweight, cast iron (GGG70) crankshaft with asymmetrical counterweights and was 3 kg lighter than the forged crankshaft in the N54 engine.
