S-TEC DG 6406 S-TEC HSI 6443 EDO AIRE DG 52D54 The Breakout Box (P/N 9524), Adapter Cables (P/N 39198 & 39199), and Extender Assembly (P/N 01264) are used to measure autopilot system power, signals, and continuity. They are connected as shown in Fig. 1-2. The third objective is to determine if the system is functioning properly in flight.

Flight Line Service Manual For Rate Based Autopilots
The System 50 is a pure rate autopilot, which uses an inclined rate gyro in the Turn Coordinator instrument as the primary roll and turn rate sensor and an accelerometer and an absolute pressure transducer as pitch rate sensors. The turn coordinator includes an autopilot pick-off, a gyro RPM detector and an instrument power monitor.

S-Tec Autopilot Systems and Components - Chief Aircraft Inc.
While the new S-TEC autopilot isn't an existing Experimental product repurposed for the certificated world, arguably it wouldn't exist save for the emergence of new autopilot options for pilots who have traditionally gone with S-TEC because it was the best-value option (often the only option) for owners of light planes whose hull value didn't justify installing a more sophisticated model ...

Contains all necessary components, hardware, and cables to upgrade an S-TEC Manual Electric Trim System to Autotrim. Autotrim upgrades are only available for System 55/55X, 60-2, and 60PSS autopilots. View More

Autopilot Upgrades - Sarasota Avionics
I have an H35 with an S-Tec 50 autopilot and manual trim. I also fly another aircraft with electric trim. Personally, I wouldn't spend the money or the weight on conversion to electric trim. It simply isn't that much trouble to manually trim the aircraft.

S-Tec 50 autopilot - ABS
Proposals for new autopilot upgrades can be shocking. Even entry-level wing-leveling systems start at \$10,000, not including installation. But that won't buy much. Higher-end models with add-on options can easily snowball a project to \$40,000. That's roughly the cost of an average engine replacement or an average Skyhawk.
