Problem started at around 90,000km (beginning of 2008 - can't remember exactly to be honest). When starting the vehicle in the morning (even though it was summer), one could hear a "knocking" noise at around 2000rpm - but only when cold. As soon as the engine reached normal running temperature - could not hear the noise anymore.

The Corolla and Yaris are near-bullet proof cars. For the v1 Yaris, as long as you get a 53 or better plate, you have nothing to worry about. Only ongoing issue I have is a power loss if I drive it around town without going on the motorway for long periods, but that seems a common problem with Toyota D4D diesel engines.

What is your general opinion of Toyota's 1.6 D4D engine? I hear it is BMW supplied and was wondering does it suffer from any DPF issues? I currently drive a Yaris Hybrid and fuel economy is dreadful in this cold weather and it is not really suitable for long distance motorway driving. I cover 20000 + miles per year. - For more news, reviews and Top Tens, visit <https://www.honestjohn.co.uk>

"the problem with the D4D isn't actually the engine itself, but more on the fuel filtering/delivery. madumi kasi ang diesel fuel natin dito, marami sediments, nagipon ang sediments at bumara sa filter, in turn, hindi umaabot sa engine ang diesel fuel. pinalitan na lahat ng filters sa assembly line, kaya lahat ng releases starting 2006, no problems na."

Toyota. Don't say you don't know about this. I've only been back from Germany barely a week and we have had nothing but customers coming in with headaches from dealers pointing fingers at everyone instead of looking at the problems. Just yesterday a customer in our shop explaining to us how Toyota are blaming everyone except looking at his vehicle.
