Ford Transit 2000 - 2001. Problem: Water in the front fog lamps. Solution: Water or moisture may accumulate in the fog lamps due to inadequate drain holes. The solution is to fit revised fog lamp boots that have extra drain holes. These have been fitted since 01/2002. Ford Transit 2000 - 2001 2.0 2.4 Di

Ford Transit Common Problems Solutions Hints and Tips ...

A quick test with a multimeter shows 12.3 volts at the battery with engine off and 12.3 volts at the Alternator, With the engine running both readings stay the same, albeit dropping all the time. So..No output at the alternator. Matey wants to go the cheap route so ordered the transplant part from dodgy dave down at the breakers.

In a Camper Van or Motorhome, you've already got a generator built-in. It's called your alternator. The engine spins the alternator which charges your starting battery which powers all of the electrical devices that your vehicle needs on a day to day basis. Spark plugs, ECU, Fuel Pump, Air conditioner blower, radio, and much more. The alternator's job is to keep that battery full.
