Exercise to practice. Try finding some moving objects in your kitchen; flowing water out of the tap, have a friend pour a liquid into a cup for you, a fan blowing, etc. Shoot it at all kinds of different shutter speeds and see what it looks like at 1/30th versus 1/2000th.

How to Practice Your Photography Skills by Getting ...

1. Best Camera Settings for Portrait Photography. I suggest you set your camera to manual mode to give yourself more creative control of your exposure. Sure, it will take a little extra time to capture your images, but you are a much better judge of how you want the final image to look than your camera.

The Best Camera Settings for Portrait Photography

In order to get a fast shutter speed of 1/125th of a second in an indoor environment, I had to use a lens with a wide aperture. NIKON D850 + 58mm f/1.4 @ 58mm, ISO 110, 1/125 sec, f/1.8 1.2) Set Aperture to the Lowest Number (f/stop) Unfortunately, to shoot at fast shutter speeds such as 1/200th of a second, you will need to have plenty of light.

Low Light Photography Tips

Personally, if I want to limit the amount of noise in a photo, I will set my maximum ISO to something like ISO 800, 1600, or 3200. The downside is that the camera will start using progressively longer shutter speeds if it reaches these ISO limits, which leads to more motion blur.

What is ISO? Understanding ISO for Beginners - Photography ...

You set the Shutter speed, Aperture and ISO. Don't forget to use the Exposure meter to check your exposure. Shutter Priority Mode (Tv): If the priority of your shot is to either show or freeze movement of your subject use this mode. You set the shutter speed and the camera can determine the Aperture and ISO needed for a good exposure.

IN PRACTICE: THE RAW FILE FORMAT. By far the best white balance solution is to photograph using the RAW file format (if your camera supports them), as these allow you to set the WB *after* the photo has been taken. RAW files also allow one to set the WB based on a broader range of color temperature and green-magenta shifts.

Understanding White Balance

Search the world's information, including webpages, images, videos and more. Google has many special features to help you find exactly what you're looking for.

Google

Let me explain. Set the shutter speed control on your camera to 500. This number denotes a fraction—500 represents 1/500 second. Now change from 500 to 250; again, this represents 1/250s. From 1/250s you go to 1/125, 1/60, 1/30, 1/15, and so on.
