### Powerful Home Built DIY Recurve Bow | Vintage Projects

A recurve bow is a much simpler style of the bow than the more popular compound bow. The term "recurve" comes from the way the bow curves away from the shooter at the ends. This allows the bow to propel the arrow with more power and energy than a traditional straight-limbed bow. This makes the arrow go farther.

Hi Bingham! I've been building laminated wood bows for several years, and at the request of a friend earlier this spring I ordered a limb package (50#, 2"wide) and built him a 68" takedown recurve with bamboo and uniweft core, using your plans. It was very successful and we were both very happy with the results. Uli Lehnert
