ScienceDaily (Jan. 4, 2012) — Exactly 100 years ago, on 6 January 1912, Alfred Wegener presented his theory of continental drift to the public for the first time. At a meeting of the Geological Association in Frankfurt's Senckenberg Museum, he revealed his thoughts on the supercontinent Pangaea, which broke apart and whose individual parts now drift across Earth as today's continents.

Earth Science: January 2012

guardian.co.uk, 26 January 2012 Like most people, when I hear the word Bhopal, it conjures up the most horrible images in my mind's eye. In December 1984 a highly toxic gas was leaked from a pesticide plant in the Indian city. Winds spread the poison through a densely populated area.
