## **Better - Gevo**

Gevo's products perform as well or better than traditional fossil-based fuels in infrastructure and engines, but with substantially reduced greenhouse gas emissions. In addition to fuels, Gevo's technology also enables certain plastics, such as polyester, to be made with more sustainable ingredients.

All the GEVO 16 engines so far are set up for water to air intercoolers. This includes the CSX and BHP Billiton rebuilds which have these because the previous HDLs had water intercoolers. However, the new design locomotives in China and the new Brazilian ES59aci units have water to air intercoolers.
