In InDesign, choose File > Print. Click Graphics. In the Fonts section, choose None from the Download menu. If the document prints, the printing problem may be related to one of the fonts used in the document. If the document uses a large number of fonts, excluding the fonts makes the document less complex.

Troubleshoot printing problems in InDesign

By default, Adobe InDesign CS3 will print to RGB output devices using a vector print path, rather than rasterizing internally, and depends on the operating system to perform the rasterizing. By default, InDesign CS3 is submitting PostScript data, and appears to be depending on some aspects of PostScript color management - but the color is getting mangled when picked up by the operating system.

Many of you are familiar with the InBooklet SE plug-in which was included with InDesign CS2 for doing simple impositions. (Impositions, sometimes called “printer spreads,” arrange the pages in the order needed for printing.) In InDesign CS3, this has been replaced with Print Booklet, available from the File menu. Why was InBooklet SE replaced?
