GLIDE BIKES GO GLIDER MANUAL Pdf Download | ManualsLib

Spin is what happens when rotation is not stopped fast enough. Fast autorotation of glider, ailerons becoming unresponsive and rapid altitude drop are making spins dangerous if not stopped. To stop gliders spinning, push opposite rudder to spin direction and stick slightly forward. When rotation stops, get rudder neutral and pull from the dive.

manual_en - Condor Soaring

The most well-known example today of a glider is the space shuttle, which literally glides back to earth. The space shuttle, like gliders that remain closer to the earth, cannot sustain flight for long periods of time. Self-launching gliders are equipped with engines; with the engine shut down, they display the same flight characteristics
