A comprehension evaluates the body e for each binding generated by the enumerators and returns a sequence of these values. Here's an example: case class User(name: String, age: Int) val userBase = List(User("Travis", 28), User("Kelly", 33), User("Jennifer", 44), User("Dennis", 23)) val twentySomethings = for (user <- userBase if user.age >=20 && user.age < 30) yield user.name // i.e. add this to a list twentySomethings.foreach(name => println(name)) // prints Travis Dennis.

For Comprehensions | Tour of Scala | Scala Documentation

Remind students to use comprehension strategies as they read and to monitor their understanding. Ask questions that keep students on track and focus their attention on main ideas and important points in the text. Focus attention on parts in a text that require students to make inferences. Reading Comprehension Worksheets | 1st - 10th Grade Passages

Effective comprehension instruction is instruction that helps students to become independent, strategic, and metacognitive readers who are able to develop, control, and use a variety of comprehension strategies to ensure that they understand what they read. To achieve this goal, comprehension instruction must begin as soon as students begin to read and it must: be explicit, intensive, and persistent; help students to become aware of text organization; and motivate students to read widely.
