Go native: Native plants are more attractive to local pollinators than imported or hybridized plants because they have co-evolved and their lifecycles are in sync. Native plants are also easier to establish and will not require the use of pesticides.

Pollinator Plants: The Best Perennials for a Pollinator ...

Many plants are wind pollinated (e.g., grasses, small grain crops, and conifers), but others rely on animals, primarily insects, to carry pollen from flower to flower. Plants attract pollinators by offering rewards, such as pollen, nectar and floral oils. Flowers also provide shelter and gathering places for pollinating insects.

Attracting Pollinators to the Garden | Ohioline

Flower colors that particularly attract bees are blue, purple, violet, white, and yellow. Plant flowers in clumps. Flowers clustered into clumps of one species will attract more pollinators than individual plants scattered through the habitat patch. Where space allows, make the clumps four feet or more in diameter.
