A teaching method comprises the principles and methods used by teachers to enable student learning. These strategies are determined partly on subject matter to be taught and partly by the nature of the learner. For a particular teaching method to be appropriate and efficient it has to be in relation with the characteristic of the learner and the type of learning it is supposed to bring about.

The principles and methods for improvement are the same for service as for manufacturing. The actual application differs, of course, from one product to another, and from one type of service to another. W. Edwards Deming, *Out of the Crisis*, page 183. For some reason some people think Dr. Deming only talked about quality improvement on the ...

Principles are the fundamental set of philosophies, propositions, assumptions, laws, and rules concerning a topic, problem, or circumstances. The principles can teach you why something works the way it does. Methods, on the other hand, are merely devices to apply those principles in a particular circumstance.

Principles vs Methods Originally  
published on 7/5/2015 A few days ago, I  
ran across a quote that keys in on a  
difference I see every day, in nearly  
every avenue of life. If you learn only  
methods, you'll be tied to your methods.  
But if you learn principles, you can  
devise your own methods.
