...

Refraction is affected by the index of refraction, the velocity, and the wavelength. In general: Refraction is affected by the index of refraction, the velocity, and the wavelength. In general: $\frac{n_2 \sin \theta_2}{n_1 \sin \theta_1} = \frac{v_1}{v_2}$ All the ratios are equal. It is helpful to recognize that only the index n differs in the ratio order.
