The story of oil production in California began in the late 19th century. As of 2012, California was the nation's third most prolific oil-producing state, behind only Texas and North Dakota. In the 20th century, California's oil industry grew to become the state's number one GDP export and one of the most profitable industries in the region. ...

California oil and gas industry - Wikipedia

Revenue from the Long Beach oil and gas program is allocated under a net profits agreement where the state receives a percentage of the profits, the operator receives a percentage of the profits, and the City receives a percentage of the profits. Between 2010 and 2014, Long Beach's oil and gas program generated approximately \$1.4 billion.
