I am really proud of our wound clinic team and since the theme of this issue is multidisciplinary care, I interviewed them about their role in patient care and their perspective on collaborative practice. Here are the responses by our lead nurse, Debi Thompson, RN, WCC, and our hyperbaric/wound technician, Tara Stone (who is also the clinic manager).

How Our Team Manages Multidisciplinary Collaborative Care ...
A model for the future. Literature on collaboration between lymphedema therapists and wound care clinicians is minimal. Lymphedema management has never belonged to any medical specialty, and only recently have U.S. clinicians become more aware of this disorder and its management. But that's changing.

A collaborative approach to wound care and lymphedema ...
Predicated on a philosophy that utilizes a multidisciplinary wound care staff jointly trained on a collaborative procedural approach that allows consistent patient care, product usage, and electronic health record (EHR) optimization within multiple facility sites, the program, as it nears full integration, also allows patients to experience the same clinical and follow-up services provided by the same healthcare staff within the network — regardless of where they receive care.

Facility in Focus: Creating a Collaborative Wound Care ...
A wound care example that has protected many a nurse and organization is the seemingly simple documentation of "wound packing removed/ wound packing inserted." Measurement and monitoring are essential in demonstrating that specific practices, activities, and expectations that the organization must have in place to comply with quality ...

Kate Summer, a wound care clinician in a urban hospital, is leading an initiative to reduce pressure ulcers. She knows from experience that more effective communication and collaborative planning by the interdisciplinary team managing these patients is crucial for reducing pressure ulcers. But doing this has been challenging for Kate.

Wound Care - NLH
As noted earlier, anatomy and physiology don't separate the venous and lymphatic systems, so wound care and lymphedema clinicians need to work collaboratively to help patients. Common goals. A good place to start collaborating is to understand that the disciplines of lymphedema therapy and wound care have many common goals, including:

A collaborative approach to wound care and lymphedema ...
The Journal of Wound Care has published "Recommendations for the management of biofilm: a consensus document," developed through the Italian Nursing Wound Healing Society. The panel that created the document identified 10 interventions strongly recommended for clinical practice; however, panel members noted that, "there is a . . .
